## BALANCERS

### pH Increaser

Convenient, granular product that raises the pH of spa and hot tub water.

### pH Decreaser

Lowers pH level to provide proper water balance. Easier and safer to store and handle than liquid acid.

### Alkalinity Increaser

Raises alkalinity level to protect spa water from sudden changes in pH.

### Calcium Hardness Increaser

Increases calcium hardness level in spa water. Helps prevent corrosion of spa equipment and surfaces.

### pH Anchor

Establishes and maintains proper pH reading in spas. Softens the water and eliminates the need for other balancing products. Use each time spa is drained and refilled.

### Spa Start-Up Kit

Perfect for new spa owners, this kit includes many great Spa Essentials products needed to get the spa up and running fast. Also includes an easy to follow spa care video and quick reference card.

## SANITIZERS

### Brominating Concentrate

Easy to use, one-step granular sanitizer and oxidizer for spas and hot tubs. Dissolves quickly and completely to establish sanitizer level in water.

### Chlorinating Concentrate

Contains 56% available chlorine for regular sanitizing and oxidizing of spa water. Granules dissolve rapidly and completely in spa water.

### Brominating Tablets

Compressed 1" bromine tablets provide long lasting sanitizing protection. Totally soluble bromine tablets offer alternative to traditional chlorine products. For use in brominators or floaters.

## ACCESSORIES

### Spa Shock

Non-chlorine granular shock treatment for spas and hot tubs. Removes unwanted organic compounds from spa water and restores water sparkle.

### Spa Shock Xtra

Spa Shock Xtra removes spa contaminants and helps restore clear inviting water. Special filter aids also enhance water clarity. pH neutral formula will not affect water balance.

### Spa Surface Cleaner

Thick, effective cleaner for removing oils, dirt, and debris from all spa surfaces. Non-abrasive formula won't scratch up spa finish. Safe for regular use.

### Stain & Scale Control

Liquid formula prevents stains from dissolved metals including iron, copper, and manganese. Also prevents scale formation from excess calcium in water.

### Defoamer

Quickly eliminates and prevents foaming in spa water.

### Filter and Cartridge Cleaner

Removes oil, grease, and other debris from spa filters to enhance filtration and improve water clarity. Use every 4 - 6 weeks to keep filters clean and operating properly.

### Water Clarifier

Clears cloudy water by helping filter collect floating particles. Improves filter efficiency without affecting water balance.

### Enzyme Cleaner

Liquid enzyme formula that breaks down oils and greases in spa water. Regular use prevents waterline build-up and keeps water clear.

### Test Strips

Test Strips provide quick, accurate results in just an instant. These strips measure free chlorine or bromine, pH, alkalinity and total hardness all on one strip. The unique bottle also includes a special liner to protect from moisture and ensure accurate testing.

### Spa Cover Cleaner Wipes

Protect your cover and restore its luster. Disposable wipes are quick and easy to use and remove oil and dirt.
